EXPERIENCE

Imaginary Foundation

Product Manager - Ecommerce

San Francisco, CA 9/2009– 2/2017

- / Used HTML, CSS, and Javascript to develop websites platforms such as Magento, Shopify and WordPress
- / Implemented SEO strategies such as meta-tags, links building and search engine friendly URLs to improve search rankings.
- / Created photos and graphics for marketing campaigns using the Adobe Creative Suite

WORK SAMPLES

SHOPSY

A single page ecommerce web app built with Ruby on Rails and React

Live | Github

- / Created a responsive design using CSS media queries for a mobile friendly browsing experience
- / Built RESTful APIs to serve data to the frontend application
- / Utilized the Cloudinary API to allow users to upload product images to their store

SUPER DUNGEON BOY

A retro style adventure game built with Javascript, HTML5 canvas and CSS

Live | Github

- / Wrote sprite animation and game physics entirely in Javascript with no external libraries or engines
- / Utilized Webpack to bundle and serve scripts

NOTECLOUD

A single page Evernote clone built with Ruby on Rails and React

Live | Github

- / Built custom modals using CSS transitions and React/Redux
- / Created custom authentication using the BCrypt gem
